Digital Construction Verification

TACKLE REWORK AT THE SOURCE

SiteAware revolutionizes quality assurance of construction by eliminating costly rework. With SiteAware, general contractors, developers, and trade partners leverage real-time intelligence to identify deviations between construction plans and fieldwork to:

- **Ensure accuracy to plan**
- **Provide certainty to schedule**
- **Improve financial performance**
- **Eliminate rework at scale**

Fieldwork errors are the root cause of all problems

40%
of projects are over budget

90%
of projects are late

30%
of construction is rework

39%
of injuries happen during rework

CORE

In real-time, verify accuracy of formwork, embeds and MEPF before they're set in concrete.

SHELL

Continuous verification of façade workmanship. Catch errors and eliminate punch list compromises.

INTERIORS

Verify interior clearances, layouts and rough-ins before boarding up walls and installing finishes.
